

Intention Tuners

Frequencies for the Intention Tuners were channeled by Edna "Violette Raye" Doane. She has heard these vibrations throughout her life but could not describe them. After swimming with the dolphins, a gateway of information opened to her revealing the frequencies of the Intention Tuners. The tuners were first shown at the "I Can Do It" Louise Hay Expo in Las Vegas in May 2004. It is a set of nine unique and ancient sounds that may help facilitate all layers of healing for our well being. Edna enjoys sharing this unique set of tuning forks to help each and everyone find their "Heart's Desires" and the courage to open the pathways of "Joy".
